Be a Hero Help Save a Life

A Defibtech AED in your dental office can make the difference between life and death.

Protect your most valuable asset—your employees.

Sudden cardiac arrest (SCA) can happen at any time. And when it happens outside the hospital fewer than 8% survive.1 In fact, SCA is such a serious medical emergency that survival rates decrease by 7-10% for every minute that passes without a shock.² Fortunately, defibrillation using an automated external defibrillator (AED) within three minutes can increase survival rates to more than 70%.3

Should an employee, customer, vendor, or any other person at your workplace suffer sudden cardiac arrest, a Defibtech Lifeline AED can make the difference between life and death. Decision makers are turning to Defibtech for its innovative offerings and value-oriented solutions.

- More than a quarter million shipped worldwide: Deployments include workplaces, government buildings, airports and aircraft, rail stations and trains, educational institutions, emergency vehicles, resorts, arenas, and marine vessels
- The Lifeline AED was the most successfully used AED in a study of minimally trained users

With a Defibtech AED, help is always within reach.

Defibtech Lifeline AEDs are so easy to use, virtually anyone can be a lifesaver.

- Clear voice prompts with visual text guidance and brightly lit progress lights, or with video in full-motion color, lead the user through the rescue step-by-step
- Built to U.S. Military specifications, Lifeline AEDs are robust, dust protected, and spray / water resistant
- Lifeline AEDs are field upgradable on-site when CPR guidelines change
